

To Change your Google/Gmail Password:

1. Go to **Home** screen.
2. Tap on the **Play Store** app icon (see pic on right).
3. The Google Play Store screen will open. In the top right corner you will see the first letter of your email address in a circle to the right of a little microphone picture (see below)

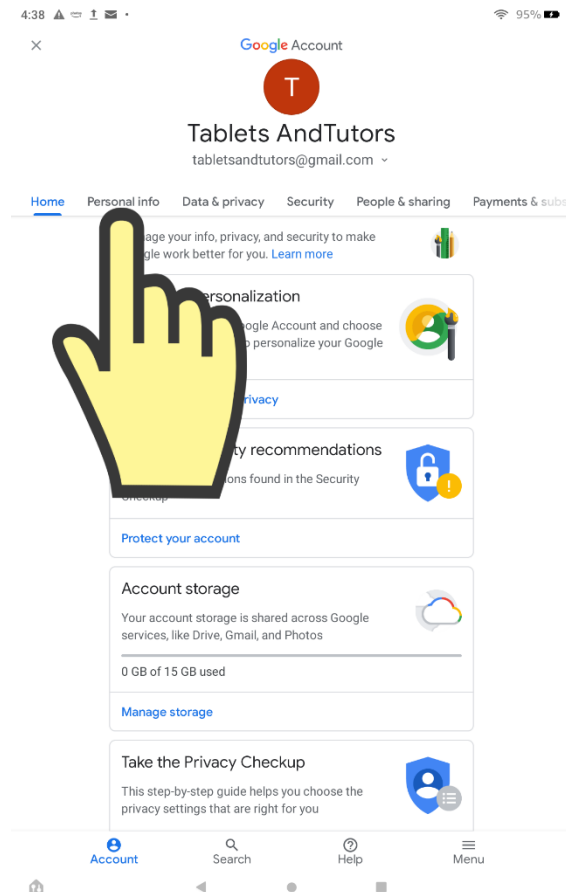

4. Press on that **Initial** icon (see above).

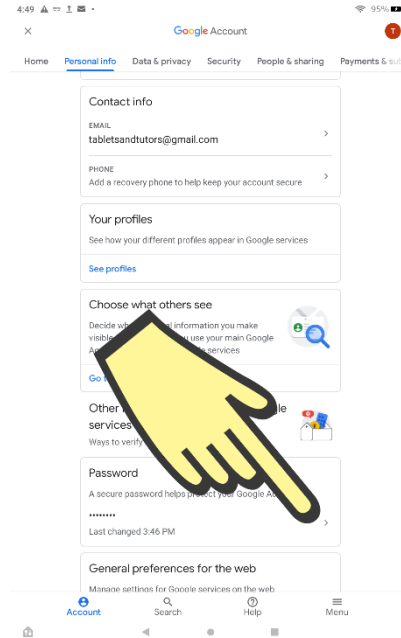

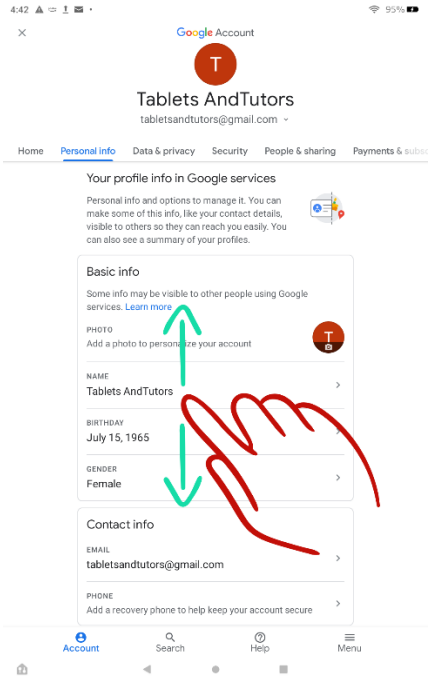

5. In the next Google Manage Screen, press on the **Manage your Google Account** button.

6. In the Subsequent account screen, press on **Personal Info** (see below)

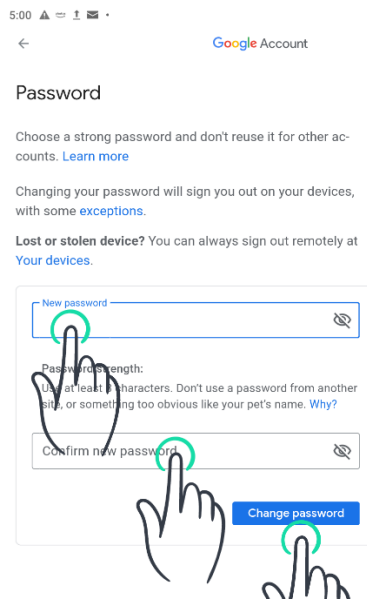

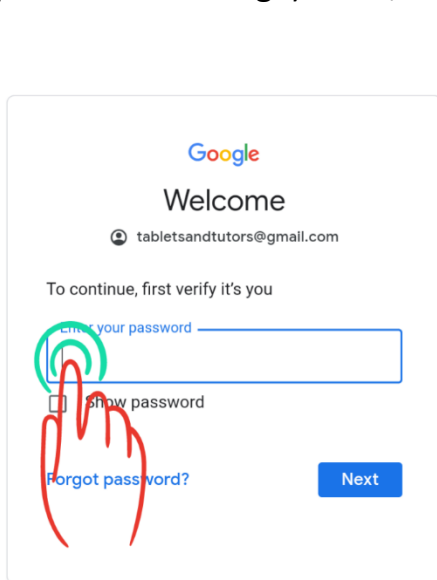

7. Press and drag slowly up until you see the Password box (see below left)

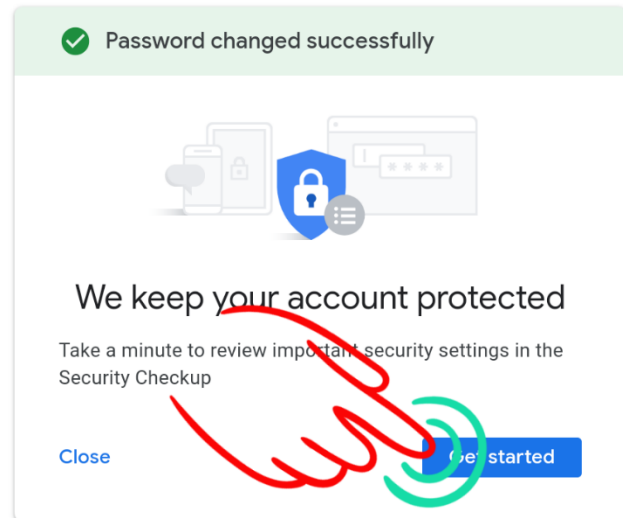

8. In that **Password** box, press on the greater than arrow (see above right).

9. In the Welcome screen, press in the **Enter your password** box and a keyboard will appear for you to type your current password (the one that you want to change). And, then click the **Next** button.

10. In the next screen, (see above right) press in the **New password** box and **type** in your new password and **tap** in the **Confirm new password** box and re-type this new password carefully to make sure you type it just as you did in the previous box. Press on **Change password** (see pic next page).

11. The Account Protected screen will appear. Click on **Get Started**. Then press on **Continue to your Google Account. You are all set! Success!**

12. Press the **Home** button (the gray circle at the bottom) to get back to your home screen.
